Instructions For Use and Installation

INSTALLATION

Your solar blanket must be installed on the pool *with the bubble side down*. If trimming is necessary, allow the blanket to rest on the pool until the packing folds have straightened. Initial cut should be slightly larger due to sun exposure. Precision trimming is necessary to ensure a custom fit. Be very careful not to cut the liner if you have a vinyl lined pool. The blanket should not overlap the pool sidewall to prevent wind infiltration under the blanket.

REMOVAL

To remove the blanket, two people can pull 3 to 4 feet at a time and fanfold the blanket in an accordion fashion outside of the pool. To avoid handling damage, do not drag across coping or rough deck. Once off *the pool, the blanket must be kept in the shade or covered with a protective cover sheet (not included)*. An *uncovered solar blanket* (when *not in use*) exposed to the sun *will result in extensive damage to the blanket and void the warranty*.

IMPORTANT MAINTENANCE TIPS

You should monitor the level of chlorine below 3 parts per million (PPM). When shocking pool, keep the blanket off for at least 24 hours. *Damage caused by excessive chlorine exposure (patches of brittle, flaked bubbles) is voids the Warranty*.

You can clean your cover using a mild detergent, water and a soft brush. A clean cover should perform much better. Store your cover away from rodents and avoid areas where temperature can reach 120°F.

PERFORMANCE

When used properly, your solar blanket will provide maximum heat by day and insulate by night. Temperature should rise by 10F or more. The blanket should keep pool cleaner, reduce chemical usage and result in water conservation.

To Avoid	Do Not	Preventive Measures
Chemical burns (patches of brittle, flaked bubbles).	Prevent excessive levels of chlorine, bromine or other chemicals.	Remove blanket during shock treatment (24 hrs.) until chemical levels return to normal 1.5 parts per million (PPM)
Worn or torn patches.	Do not drag blanket over abrasive coping or sharp edges.	Handle with care. Apply a protective padding over sharp edges.
Blistering or delaminating.	Do not leave solar blanket uncovered and exposed to the sun while not in use.	Use the white protective cover when exposed to the sun or store blanket in shady area.

Blankets returned that reveal above damages are NOT covered by the warranty!

WARRANTY CLAIM

The solar blanket may be returned prepaid to Coverttech Industries Limited for inspection. Send us a 2' x 2' section of the defective area. Whether you send the blanket or the 2' x 2' section, you must accompany the shipment with the Warning Label (which is attached to the cover) and proof of purchase.

In order to process the warranty claim, all 3 items must be forwarded to Coverttech Industries Limited. Failure to provide all the information will void the warranty. Coverttech Industries Limited will not be held responsible for the solar blanket post the warranty period.
