

Insul-Floor™

Reflective Insulation For Pool Floors

Vapor barrier and radon inhibitor, not affected by moisture and humidity, will not compress, collapse or disintegrate.

Advantages:

- **Maintains solar energy in water**
- **Breaks thermal bridge between the liner and ground**
- **Excellent vapor barrier**
- **Reduces heat loss up to 80%**
- **Quick and easy to install**

Features:

- **Metalized Foil, bubble, clear poly**
- **140 PSI compression rate**
- **69 PSI puncture rate**
- **Durable and light weight**
- **Adds R-Value**
- **No mess or itchy fibers**

Installation Method

- 1. Insulation is 48" width, easy to handle and install**
- 2. Ensure the seams butt together**
- 3. Seal seams with white poly tape (3" wide)**
- 4. Cut the perimeter of material to the size and size shape of the pool**
- 5. Install Liner**
